

Linda Bengtsson

Fullstack developer & designer building digital products that look as good on the surface as they are smart on the inside. With a background in digital process optimization and international internship experience from Sydney, I bring both business acumen and broad technical expertise to the team.

Experience

Frontend Developer (Internship) | Woolly Mammoth, Sydney.

October - December 2025

Designed and developed a custom 24/7 office TV dashboard to increase internal time tracking compliance and provide real-time project budget overviews.

- **Technical Solution:** Built with Next.js, TypeScript, and Framer Motion. Integrated real-time data from the Harvest API (time budgets and active projects) and a headless CMS (Sanity) to manage employee profiles.
- **Process & Collaboration:** Managed the entire lifecycle from UI/UX design in Figma to deployment. Worked in a tight feedback loop with the Manager to iterate on features and animations.
- **Results:** Deployed live in the office, directly streamlining budget tracking and reducing forgotten time logs. The performance resulted in a direct offer for a second internship period.

Technical skills

Programming & Frameworks: React, React Native, TypeScript, Next.js, JavaScript (ES6+), Node.js, Express, REST API, SQL, MySQL, MongoDB, Prisma, Modern CSS, SCSS, Material UI, Framer Motion, GSAP

Design & UI: UX/UI Design, Responsive Design, Prototyping in Figma

Cloud, Databases & DevOps: AWS, Railway, MongoDB Atlas, Docker, DevOps Fundamentals

Tools & CMS: Sanity, Git, GitHub, Figma, VS Code, Cursor, Postman

Methodologies & Processes: Agile Methodologies, Kanban, CI/CD

Projects

Adrenalink – Boknings- & administrationssystem (Pågående)

UX/UI design and fullstack development of an administrative system for a client in Spain, including an accompanying web and mobile application for end users.

- **Tech stack:** Built with React, TypeScript, and React Router on the frontend. Backend developed in Node.js and Express using Prisma as an ORM connected to a MySQL database.som ORM mot en MySQL-databas.
- **Architektur & Deployment:** FFrontend deployed on Vercel; backend/database running on Railway. Continuous design process managed in Figma (design files and source code available on GitHub).
- **Demo:** (<https://adrenalink-webb.vercel.app/>).

Movie Roulette: Designed and developed a mobile app solving the dilemma of picking movies for movie nights. Built with React Native, TypeScript, and Expo Go fetching data from the TMDB API. Source code and design available on portfolio and GitHub.

Unit Converter: Designed and developed a mobile unit converter using React Native, TypeScript, and Expo Go. Source code and design available on portfolio and GitHub.

Portfolio Migration: Migrated personal portfolio from React/JS with JSON data storage to Next.js and TypeScript, utilizing Sanity as a flexible page builder.

Education

Fullstack developer | Higher Vocational Education (Yrkeshögskolan i Borås), 2025- Present

2-year higher vocational diploma program including 24 weeks of internship (LIA).

Programming 1 (C# / .NET) | NTI Skolan 2024

10-week intensive course in fundamental object-oriented programming.

Other Work Experience

Administrator & Teamlead | Region Stockholm (SLSO)2018 – 2025

(On leave for studies)

- **Digital Process Optimization:** Focused heavily on streamlining, structuring, and improving digital workflows and internal processes.
- **Responsibilities:** Led teams with a solution-oriented approach, managed master data (article management), and coordinated cross-functional collaborations between departments.

Various Roles in Service, Retail & Events | ICA, Stadium, Monster Energy

2009 – 2018

- Hands-on experience focused on customer relations, high-paced operations, and teamwork.
